

SYED MOMIN ALI SHAH

Web Developer

Mehran Tower Scheme 33 Sector 35A | +92 304 2151667 | smshah.2003@gmail.com | www.linkedin.com/in/smsah121

PROFESSIONAL SUMMARY

Final-year BS Software Engineering student and Full Stack Developer with experience developing scalable web applications using React.js, NestJS, and PostgreSQL, skilled in designing RESTful APIs, implementing JWT-based authentication, and developing role-based systems, and delivered multiple production-level projects, including e-commerce and learning management platforms.

EDUCATION

Bachelor of Science in Software Engineering | Iqra University Main Campus

(2023-Present)

Faculty of Science in Pre-Engineering | New Aligarh Degree College

(2020-2022)

EXPERIENCE

Full Stack Developer Intern (Remote)

(July 2025-Aug 2025)

Intern Intelligence

- Independently designed and developed a role-based e-commerce platform using React.js, NestJS, and PostgreSQL.
- Delivered two development tasks end-to-end within deadlines, ensuring clean and maintainable code.

PROJECTS

E-Commerce | Full Stack Web Application

- Created a role-based e-commerce platform with secure authentication for Admin and Customer.
- Customer features:** browse products, add to cart, place orders, view order history, profile management, live search.
- Seller features:** product CRUD, upload images/PDFs, manage customer orders, real-time order tracking, and multipart file handling.
- Integrated Stripe API for secure payment processing with webhook-based automated order status updates.
- Technologies: React.js, Tailwind CSS, NestJS, PostgreSQL, JWT, Redux Toolkit, Stripe API, Framer Motion.

Learning Management System (LMS) | Full Stack Web Application

- Built a role-based LMS for students and instructors with secure JWT authentication.
- Students:** view enrolled courses, lectures, and course announcements.
- Instructors:** create courses, add lectures (with document uploads), manage students, and track engagement.
- Engineered real-time UI updates via RTK Query caching and invalidation.
- Technologies: React.js, Tailwind CSS, NestJS, PostgreSQL, Redux Toolkit, JWT, Framer Motion.

Pixora | Full Stack Web Application

- Built a media collection platform allowing users to save photos, videos, and GIFs, create custom collections, and view saved items.
- Ensured user-specific private data with secure JWT authentication and password hashing.
- Integrated Google OAuth 2.0 authentication and implemented protected routes for authorized users.
- Technologies: React.js, Redux Toolkit, Tailwind CSS, NestJS, PostgreSQL, JWT, Google OAuth2.

Personal Quote Management | Full Stack Web Application

- Google OAuth2 authentication with secure user authorization and protected routes. Created signup/login functionality and user-specific data access, ensuring each user sees only their own quotes.
- Enabled users to add, edit, delete, or copy quotes with a clean, responsive UI.
- Technologies: React.js, Tailwind CSS, NestJS, PostgreSQL, JWT Authentication.

TECHNICAL SKILLS

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Redux Toolkit, Framer Motion

Backend Technologies: Node.js, NestJS, TypeScript, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC)

Database: PostgreSQL, TypeORM

Tools & Platforms: GitHub, Render, Netlify, Neon, Cloudinary
